

PMR
CONSULTING
SINCE 2005

Mining Services

PMR Consulting provides a full suite of Mining Services that improve efficiency, reduce costs, and increase productivity and profits.

Increasing production and operational excellence through innovative techniques & technologies ... that's the bottom line.

Whatever you mine or wherever you are in the world, PMR Consulting brings a wealth of expertise to your mine. PMR Consulting evaluates mining equipment, people, processes and technologies, and then implements international best practices specific to your mine.

The result is improved efficiency, reduced costs, and increased productivity!

We understand you

Over the last decade, PMR Consulting has worked closely with the mining industry to understand the problems that plague mine owners and operators. Our experienced staff offers a full suite of Mining Services for clients worldwide: engineering design, operational practice, health, safety, quality assurance and training programs. These programs empower employees, improve product quality, increase productivity and profits, and enhance the environment where people work.

Underground Mine Setup & Existing Mine Improvement

- Underground mine layout
- All underground equipment specifications
- Power distribution
- Personnel transportation
- Surface facilities
- Mine ventilation plan
- Material haulage conveyor systems
- Mine dewatering plan
- Slopes and shafts
- Surface roads access
- Equipment maintenance programs
- Material processing and handling infrastructure

Transportation & Logistics

- Truck loading/unloading systems
- Traffic coordination
- Rail loading/unloading systems
- Scheduling—shipping and receiving coordination
- Conveyor systems
- Storage and reclaim systems
- Product blending

Management Efficiency

- Evaluate and refine management style and design
- Teach PMR “Cohesive Management Plan”
- Update mining philosophies—from reactive to pro-active
- Implement methodologies for effective goal planning
- Provide team building activities for management teams

Refuse Site Design, Setup, & Improvement

- Refuse design
- Refuse disposal operations
- Refuse disposal equipment requirements
- Detainment and containment structures
- Refuse haulage systems

Train & Truck Load-out and Dump Facilities

- Automatic truck loading facilities
- Material reclaiming infrastructures
- Batch weigh train load-out facilities
- Flood type train load-out facilities
- Material dumping systems and infrastructure

Operational Efficiency

- Evaluate existing practice and implement appropriate practices
- Implement best practice operations
- Train all mining skills
- Implement morale improvement techniques
- Teach PMR "Teamwork Program"
- Provide mining sequences and coordination
- Improve equipment operation efficiency

Coal/Product Preparation Plant Design, Re-design & Implementation

- Design ground up all structure and equipment
- Monitor and evaluate construction and start-up
- Evaluate and re-design or retrofit of existing plants
- Evaluate efficiency for optimal performance

Operating Personnel & Training

- Provide management, operational and maintenance personnel on an as needed basis
- Offer a full suite of **Mining Training** that educates all staff levels to ensure a more proficient, productive, and effective workforce

Where do we operate?

PMR Consulting offers its full suite of Mining Services in virtually any country in the world. We have provided our services throughout the United States, Europe, Africa, Asia, and Australia.

Partnership with PMR Consulting

Our staff of highly qualified professionals has the experience and knowledge to help you identify the solutions that will improve your production, efficiency, and employee morale.

Surface Operation Design, Setup, & Improvement

- Surface equipment specifications
- Surface layouts and plot drawings
- Material handling infrastructure
- Office, shops and warehouse facilities.
- Surface organization programs
- Main electrical power installation
- Traffic logistics
- Surface equipment maintenance programs

Complete Mine Projections *beginning-to-end-of-mine projections*

- Long range mining and production projections
- Mine life capital cost projections
- Equipment life cycle projections
- Mine expansions with equipment projections
- Manpower requirement projections
- Mine operation cost projections
